

VIBE

Rechargeable Silicone Anal Plug with Wireless Remote

Care and Usage Instructions

A-Play VIBE is an anal plug crafted in premium silicone with 10 vibrating functions and designed to conveniently recharge with the included USB Cable.

The VIBE has a wide base for safe, comfortable use and can be used with its included remote control.

To Turn Vibrations on:

On the VIBE:

1. Press and hold  for 3 seconds until the LED display shows.
2. Continue to press  to cycle through 10 vibration patterns.

On the Wireless Remote:

3. After completing step 1, press  to turn on and cycle through 10 vibration patterns.

To Turn Vibrations off:

On the Wireless Remote:

Press  to turn off vibrations temporarily.
LED display on VIBE will remain on.

On the VIBE:

Press and hold  to power off product after use.
LED display will turn off.

To Charge A-Play VIBE:

Plug included cable into a USB power source, then locate the charging port on the VIBE and plug in.

- * The charging port may appear too small due to the protective silicone exterior, but will stretch to accommodate the charger.

Charging time: 90 minutes
Usage time: 60 minutes

Cleaning and Storage:

Spray your A-Play VIBE with Doc Johnson Toy Cleaner or wash with mild soap and warm water. Allow to air-dry completely before storing separately from other toys in a cool, dry place. Use with water-based lubricant/glide. Doc Johnson Toy Cleaner sold separately.

Warning for Vibrating Products: To avoid injury or aggravation of pre-existing conditions, this product should not be used on swollen or inflamed areas or skin lacerations. No medical claims are warranted or implied by the use of this product.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
