

# PIPEDREAM FFS 6" HOLLOW RECHARGE STRAP ON

## User manual

### CONTROL

- 1) To turn on the vibrator, hold the button on the testicle with the wave symbol for about 3 seconds. The LED will light up.
- 2) Subsequent short presses of the same button change the vibration mode and intensity.
- 3) To switch off the vibrator, hold down the button with the wave symbol for approx. 3 seconds.

### MAINTENANCE

After each use, rinse the vibrator with lukewarm water and soapy detergent. You can also use an **erotic cleaner**, which also helps to remove microscopic dirt. Simply spray the product, leave it on for about 1 minute and then dry with a towel or cloth that does not leak fibers.

### WATERPROOF

The vibrator is **water resistant**, so maintenance is very easy. The vibrator can be splashed with water, but you **MUST NOT immerse it in water!** Waterproof means that you could completely submerge the product in water and enjoy water play. Due only to the water resistance of the product, this is not possible in this case.

### LUBRICATION

Due to the material of the vibrator, you can use **lubricants of any base**.

### DRIVE AND CHARGING

The vibrator is powered by an integrated Li-on battery, which is approximately half charged from the factory, but we recommend that you fully charge it before first use. Charge the battery using the included USB cable, which can be plugged into a phone adapter, PC or powerbank.

### STORAGE

Store separately from other erotic aids in a dry and dark place.

### PACKAGING CONTENTS

In the package you will find a vibrator with a harness and a USB cable for charging.
