- Weight: 158 g

## HOW TO USE THE FEMMEGASM

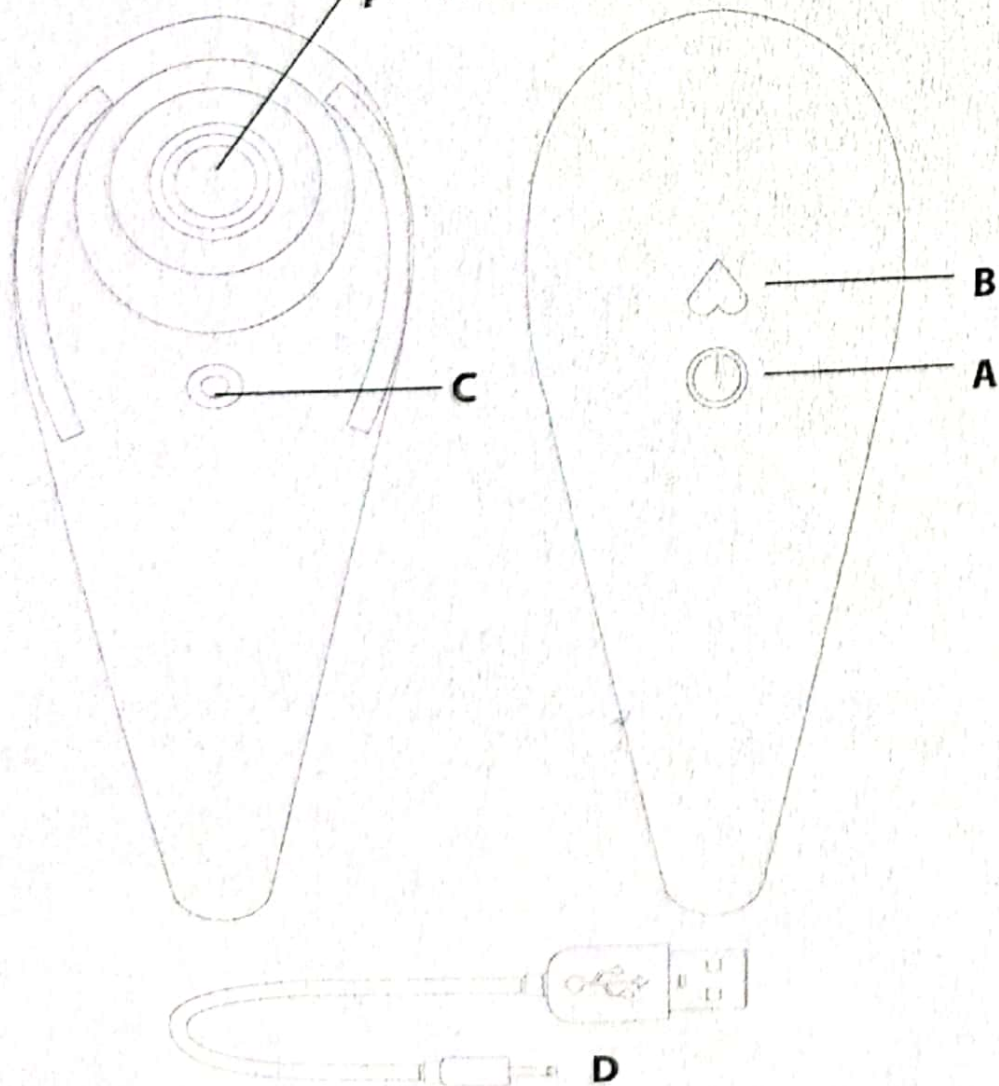

**A:** On / Off / Standby / Vibration modes

**B:** Tapping & tickling vibration modes / Boost

**C:** Charging port

**D:** Charging pin

**Tapping & Tickling  
pleasure zone**

**Important:** don't insert the total FemmeGasm into your body; use it for external stimulation only.

## Charge the FemmeGasm

Use the included (USB) charging cable to charge the FemmeGasm. Put D into C and (usb) charge it (f.e. with computer (usb port) or with wall socket). The battery is fully charged when the light stops blinking and is constantly on. When it starts blinking again, it needs charging.

## Put product on stand-by

Press and hold button A for 2 seconds to turn on the FemmeGasm. The light will go 'on' and product is in mode 'stand-by'.

## To operate the tapping & tickling pleasure zone:

1. Click button B shortly to go to tapping & tickling vibration mode 1 (out of 6).
2. Click button B again to go through all the modes. There are 6 modes in total.
3. Pushing the button B for 2 seconds will make it go to boost. When you click on B again; then the vibrator will go back to modus 1.
4. To turn off the tapping & tickling pleasure zone: push button A for 2 seconds to turn off the product.

## To operate the (lay-on) vibrator lower part:

1. Put the FemmeGasm in stand-by modus by pressing button A for 2 seconds until the light goes on.
2. Click button A again to go to vibrate mode 1 of vibrator part of the FemmeGasm.
3. Clicking button A again will make it go (in a loop) through all 6 vibration modes.
4. To turn off the vibrator zone: push button A for 2 seconds. The power is off now.

**To operate the tapping/vibration pleasure zone & lower vibrator part together:**

1. Press and hold button A for 2 seconds to turn on the FemmeGasm. The light will go 'on' and product is in modus 'stand-by'.
2. Click button B shortly to go to tapping & tickling mode 1 (out of 6). Click on B again to go to the next mode.
3. Click button A shortly to start and go through all 6 vibration modes. Both motors are working now.
4. To switch off both motors: press button A for 2 seconds.

**Notification:** once both motors are on simultaneously, you cannot turn off just one motor separately. You need to push button A for 2 seconds to turn (both) motors off and then restart the motor of your choice following the instructions as explained above.

### **Lubricant**

Always use a good lubricant for optimal pleasure. We recommend to use a water based lubricant together with this toy (and preferably not a silicone lubricant, because some silicone lubricants could have a negative effect on the silicone coating of the product).

### **Cleaning**

We strongly recommend you to clean the vibrator before and after usage. Clean the FemmeGasm with a special toy cleaner or with warm water and (mild anti-bacterial) soap. Rinse with clean warm water and pat dry with lint-free cloth or towel. Never use cleansers containing alcohol, petrol or acetone! This can affect the silicone material.

### **Storage**

Avoid leaving your FemmeGasm in direct sunlight and never expose it to extreme heat. Store your FemmeGasm in a dust-free place and keep it away from products of other materials.

### **Safety**

If you feel discomfort during usage, you should stop using the FemmeGasm and consult your healthcare provider.

### **Disposal Information**

This product may not be treated as household waste. For correct disposal, bring this product to the appropriate collection point for recycling of electrical and electronic equipment.

### **Disclaimer**

This product is intended for adults only. Feelztoys assumes no responsibility or liability for the use or misuse of this product.
