Cleaning, Storage & Safety

To prolong the life of your Nexus Revo we recommend that you follow the steps below:

- Never use a silicone based lubricant as this will react with the silicone of your Revo and alter the feel of the toy. We recommend that you use a thick, high quality water based lubricant such as Nexus Slide or Nexus Slip.

- Clean thoroughly before and after use. Nexus Revo is waterproof so you can wash with warm soapy water or simply spray with Nexus anti-bacterial Wash, wipe with a damp cloth and leave to dry.

- Never use cleaners which contain alcohol or acetone.

- Carefully storing your toy in a cool, dark place will prevent potential damage from dust and sunlight. We provide a discreet storage pouch which will keep your toy dust free and protected. Never leave Nexus Revo in direct sunlight and always store separately from other toys.

Preparation

To enjoy a comfortable prostate massage it is important to prepare beforehand. We recommend you empty your bowels and clean the

area externally.

However, if you would like to enjoy a more thorough cleanse before your prostate massage you can achieve this easily with the use of a Nexus Anal Douche.

Fill the bulb with clean, warm water and gently insert the nozzle into your anus. Squeeze the bulb so that the water enters your anus and then allow the water to flow back out. Repeat this several times until the water runs clear. If you feel any cramps or discomfort, remove it immediately and allow the water to pass back out.

Once you feel clean and prepared add a liberal amount of good quality, water-based lubricant before use.

You are now ready to proceed to the most pleasurable part – prostate massage.

Tips for Use

If you are new to using anal toys, we recommend that you follow these step by step instructions:

- Apply a liberal amount of lubricant to the shaft of the toy and also around your anal area.
- Lie on your side with your knees bent towards your chest.
- With your free hand, slowly insert the shaft into your anus and gently push in until the perineum point touches your body. You may find it is pleasurable to breathe in slowly as you push the toy in and then exhale once it is comfortably in place.
- Spend a minute or two lying still and concentrate on the 'full' sensation you are experiencing.
- When you feel ready, switch on the toy so that the shaft rotates and the perineum stimulator vibrates. You will now experience the full effect of the dual stimulation.
- You can simply leave the Nexus Revo in place and concentrate on the pleasure, or you can experiment with other sensory stimulation. This could be additional stimulus of the penis, a body massage from a partner, watching an erotic movie – the possibilities are endless.
