### Charging

Revo Embrace is fully rechargeable via a USB lead which plugs directly into your computer or laptop. Located underneath the toy and the remote control, there are two magnetic contacts where you attach the magnetic charge pad. Before charging, make sure that the magnetic contacts are clean.

To show that the toy is charging successfully, the lights on the On/Off buttons will illuminate red. When fully charged the lights will change to green. When your Revo Embrace or remote are running low they will flicker green to indicate that you should charge soon.

Standard charging time is 75 mins which will give you 75 mins of play.

### Modes and Functions

We recommend that you explore all the settings of your Revo Embrace before using it for the first time, so that your experience is optimised from the start.

- Waterproof, rechargeable remote control

### Using the controls of Revo Embrace

For shaft rotation, push the ON/OFF button, on the underside of the toy, nearest the shaft  for 1 second. To change the speed and rotation direction simply keep pushing the .

For perineum vibration, push the ON/OFF button, on the underside of the toy, nearest the rings  for 1 second. Once vibration is activated, scroll through the functions to find your combination of choice.

To turn either motor off, simply hold a button down for 2 seconds until the vibration stops.

### Using the remote control

To use the remote control you will first need to turn Revo Embrace ON by pushing the vibration button on the underside of the toy. Once ON you can control the toy with the remote control up to 8 metres away. To change the shaft rotation speed and direction simply press the rotation button on the remote control.

To change the perineum stimulator vibration simply press vibration button on the remote control.

One remote control can be programmed to use with more than one Revo Embrace. To do this simply hold down the vibration buttons on the toys for 5 seconds until the light flickers red. The lights will turn green on all toys when the remote control ON/OFF buttons are pressed.

## Cleaning, Storage & Safety

To prolong the life of your Nexus Revo Embrace we recommend that you follow the steps below:

- Never use a silicone-based lubricant as this will react with the silicone of your Nexus Revo Embrace and alter the feel of the toy. We recommend that you use a thick, high quality water based lubricant such as Nexus Slide or Nexus Slip.
- Clean thoroughly before and after use. Nexus Revo Embrace is waterproof so you can wash with warm soapy water or simply spray with the

anti-bacterial Nexus Wash, wipe with a damp cloth and leave to dry.

- Never use cleaners which contain alcohol or acetone.
- Carefully storing your toy in a cool, dark place will prevent potential damage from dust and sunlight. We provide a discreet storage pouch which will keep your toy dust free and protected. Never leave Nexus Revo Embrace in direct sunlight and always store separately from other toys.

## Preparation

To enjoy anal play it is important to prepare beforehand. We recommend you empty your bowels and clean the area externally.

However, if you would like to enjoy a more thorough cleanse you can achieve this easily with the use of a Nexus Anal Douche.

Fill the bulb with clean, warm water and gently insert the nozzle into your anus. Squeeze the bulb

so that the water enters your anus and then allow the water to flow back out. Repeat this several times until the water runs clear. If you feel any cramps or discomfort, remove it immediately and allow the water to pass back out.

Once you feel clean and prepared add a liberal amount of good quality, water-based lubricant before use.

You are now ready to proceed to the most pleasurable part – prostate massage.

## Tips for Use

Apply a liberal amount of lubricant to the shaft of the toy and also around your anal area.

Slip you flaccid penis through the ring furthest from the shaft, then gently pull your testicles through the remaining ring.

Finally, slowly insert the shaft into your anus and gently push in until the perineum point touches your body. You may find it is pleasurable to breathe in slowly as you push the toy in and then exhale once it is comfortably in place.

When everything is comfortably in place you can switch on the toy so that the shaft and perineum stimulator vibrates. You will now experience the full effect of Nexus Revo Embrace.

Simply masturbate or use Nexus Revo Embrace with a partner.
