

You2Toys RC Medical Silicone Thrusting remote body vibrator

USER MANUAL

CONTROL:

- 1. Turning On/Off:** Turn the device on by pressing and holding the "ON/OFF" button for approximately 2 seconds.
- 2. Changing Modes (Vibration/Thrusting):** Briefly press the "ON/OFF" button (for 1 second) to cycle through the 8 available modes.
- 3. Remote Control:** Press and hold the button on the remote control for 2 seconds to switch the device to Standby mode. A short press (1 second) allows you to cycle through the 8 individual programs.

MAINTENANCE:

ATTENTION! After each use, do not forget to thoroughly clean the device; this will extend its lifespan.

We also recommend using a sex toy cleaner, which also helps remove microscopic dirt. Simply spray the product on, leave it on for about 1 minute, and then dry with a lint-free towel or cloth.

WATER RESISTANCE:

The product is fully **waterproof**.

LUBRICATION:

Use only WATER-BASED lubricants. Other lubricants (e.g. silicone) could irreversibly damage the surface of the device and make it sticky.

CHARGING:

The product is powered by a high-quality integrated Li-Ion battery, which comes partially charged from the factory. We recommend fully charging the battery before first use.

- **Charging method:** using the included magnetic USB cable connected to a power adapter, PC, or power bank.
- **Charging time:** approx. 120 minutes (a full charge provides up to 40 minutes of operation).

STORAGE:

Store separately from other sex toys in a dry, cool and dark place out of the reach of children.

PACKAGE CONTENTS:

- 1× vibrator
- 1× user manual
